

Name: Leif Anders, Andrew Scott

	Task1 (what is it): Search for an <i>automotive</i> item, that is <i>reasonably priced</i> , in <i>good condition</i> , and <i>located</i> in the local zip code	Task2 (what is it): Post an item on site
Tester (name):	Oliver	Ferrin
Observations (both the tester's observations and your observations as designers):	<p>Search items filters should present as a list or interactive UI buttons.</p> <p>Task seemed too simple because lack of time left us unable to flesh out actual UI changes between search steps.</p>	<p>Should be able to add pictures and item description to post as well.</p> <p>Similar to last point, difficult to flesh out all UI changes given the time constraint</p>

**What would you change about your design based on the observations?**

We would try and the features suggested by the testers.
